

Project THRIVE

TCC Subproject 2

There is no health without mental health
~David Satcher, MD, PhD

Phase I

Qualitative Data Collection (Focus Groups and Key Informant Interviews)

Phase I Outcomes

Provided the building blocks for development of integrated care model

Phase II

Intervention introduced at 3 community-based primary care clinics affiliated with Grady Health System

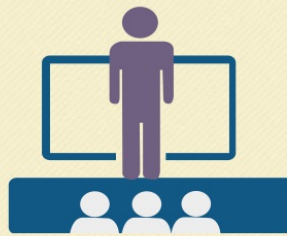

Technology

Culturally-centered training video developed; M3 and Healthify used in clinics for patient screening

Patient Engagement

- 330 adults referred for consultation
- 174 seen by the BHC
- 136 have co-occurring chronic diseases with depressive symptoms

Phase II Implementation

Behavioral health consultant (BHC) introduced into each of the 3 Grady Primary Care clinics

Leadership Development

Two (2) of the collaborating Grady clinics enroll in the SHLI Integrated Care Leadership Program

Communication and Dissemination

- 23 Professional & Community Presentations
- 9 Publications
- 7 Media Engagement
- 1 Secondary Data Analysis of HHS Region IV Medicaid data
- 1 Health Policy/Issue Brief

Sustainability

Continuing to explore and submit to several funding opportunities towards project sustainability

Overall Health and Wellness
